

Business, Educational and Research Cooperation between Institutions of Northern Finland and North-West Russia (BERMAP)

The fourth Business Workshop of the BERMAP-project focuses on water systems and on use of chemicals in water purification processes

The fourth Business Workshop of the BERMAP-project was held in Murmansk on 20th of November. The seminar was held in cooperation with the Department of Ecological Protection of MSTU, which had found out, which current issues about environmental technology raise questions among local companies and others. Based on this survey, the renovation and maintenance of water systems and the use of chemicals in water purification processes were selected as the main topics of the event.

Russian affiliates of Scandinavian companies, ZAO Kemira Eco and ZAO Per Arsleff, had sent their representatives to the seminar. ZAO Kemira's lecture dealt with the use of coagulants and flocculants, whereas the lecture delivered by ZAO Per Arsleff focused on the renovation of the water systems. Companies, water plants, authorities and other interested parties from Murmansk and from other cities of the Kola Peninsula had been invited to take part in the seminar.
